LAYER7AI

Product Management Internship (m/f/d) – Tübingen

Flexible start date from January 2020 onwards (3 to 6 months)

What we do

At Layer7 AI we don't only consult on matters around Artificial Intelligence (AI), but we also leverage promising datasets to either identify, train and implement customized AI models for our clients or to build standalone scalable AI products. One of those products is our ML-based quality control (QC) product. Based on the latest advancements in machine vision and deep learning, we help industrial clients to significantly improve their quality inspection processes. To stay on top of the latest developments in machine learning we collaborate with selected scientists from the Max-Planck-Institute for Intelligent Systems and the University of Tübingen, which is also the reason why we are based in Tübingen – Germany's top location for modern machine learning. Our team consists of AI researchers, former management consultants, and software engineers.

Job

- You work at the intersection of our CEO, CTO, ML- and software engineers to develop our ML-based quality control product for large industrial clients
- You become our product champion, who fully understands the user, market, and competition
- You help build and commercialize a cutting-edge ML product with an intuitive UI
- You develop the product roadmap, prioritize feature development, and manage internal stakeholders
- You work in an agile customer-centric environment, making a product vision become reality
- You directly collaborate with customers and external partners
- You prepare and participate in management meetings to define the strategy for our QC product

Your profile

- You are currently pursuing or are a graduate of a bachelor's/master's degree in business, engineering, software engineering, or related fields
- You have a strong passion for startups and knowledge of agile and lean methodologies
- You already have relevant work experience (startup, consulting, agile organizations, etc.)
- You have an entrepreneurial mindset and very strong analytical and conceptual skills
- You demonstrate a pro-active work ethic: goal-driven, independent, and structured
- You possess excellent communication (verbal and written) and interpersonal skills to effectively communicate with our business and tech teams – basic tech knowledge is a strong plus here

What we offer you

- You shape Layer7 AI and our product development right from the start
- You create "impact" – it is our aspiration that your ideas and analyses are rapidly implemented
- You have the unique opportunity to experience how business, software, and machine learning expertise are combined to create a cutting-edge B2B product
- You work in flat hierarchies with a dynamic and highly competent team
- You generate valuable learnings in the technology of the future: artificial intelligence
- You get the opportunity to transition into a permanent full-time position
