

# LAYER<sup>7</sup>AI

## Product Manager (m/f/d) – Berlin / Tübingen / Remote

*Start now*

### About us

Our product, Maddox AI, is an AI-based visual quality control solution, which can automate manually performed quality inspection for manufacturing companies. Maddox AI is an asset-light SaaS solution, which addresses those visual inspection tasks that are still performed manually, as conventional (=rule-based) computer vision methods fail. In product development, we closely collaborate with leading AI researchers from the Cyber Valley. Prof. Dr. Matthias Bethge, Prof. Dr. Alexander Ecker and Dr. Wieland Brendel have been researching in the field of machine learning and computer vision for years and are part of our founding team.

Maddox AI is used by DAX-30 companies as well as by large medium-sized enterprises. Our team consists of scientists, former strategy consultants, mechanical engineers and software developers. We know that Layer7's success is only made possible by our unique team. As we continue to grow, we want to convince the best and brightest minds of our mission to establish Maddox as the modern quality management platform.

### Your role

- You lead the co-creation process to ideate on topics, align on goals and make sure that ideas are in balance with business goals and user problems
- You shape the product vision, elaborate the short- and long-term product strategy, own the E2E product lifecycle and drive new feature development from discovery to delivery
- You are the central point of contact for the entire product development process and communicate product plans, benefits and results to all audiences
- You work collaboratively and on eye-level with engineering, UI/UX design and other cross-functional teams to clearly convey product direction and deliver product milestones
- You present and discuss ideas with internal and external stakeholders and incorporate their feedback

### Your profile

#### *Minimal qualifications*

- You hold a degree in business studies, product management, innovation management or a related field
- You have experience with modern product management tools like Jira, Productboard, Airfocus, etc.
- You can identify the biggest problems to solve, prioritize rigorously and slice work packages with an agile mindset
- You have experience in gathering and managing product feedback through surveys, concept testing, analytics tools, and A/B testing and ability to use this data and metrics to back up assumptions, recommendations, and drive action
- You can rely on strong communication skills in presenting your concepts and ideas in English, preferably also in German

#### *Preferred qualifications*

- You have already worked in a product management or innovation management role or a related field
- You have successfully launched and scaled B2B tech products in the past
- You already have a basic understanding of UI/UX
- You understand the basic concepts of machine learning and IIoT topics or are willing to learn about it

Note that preferred qualifications are just that: preferred. None of us started out with all boxes ticked. If some of these points apply to you, we definitely want to talk.

# LAYER<sup>7</sup>AI

## Why us

We work in flat hierarchies, value direct communication, learn a lot as a team and make important decisions together. At Layer7 you can expect the following benefits:

- Independent work on projects in the field of artificial intelligence / Industry 4.0
- Flat hierarchies, a growth perspective and very good development opportunities
- A dynamic and motivated team with great colleagues (with experience from BCG, IBM, SAP, Cyber Valley, etc.)
- A competitive fixed salary, 30 vacation days and the opportunity to participate in the company's development through virtual shares (VSOP)
- The possibility to work flexibly in Berlin, Tübingen or remotely
- Regular team events
